## IN THIS ISSUE

### PACKAGING & PROCESSING

#### The Optimised Oven

As the market shifts and evolves, an oven's flexibility can be a make-or-break feature.

### INGREDIENTS & ADDITIVES

#### Tocotrienol: Matters Of The Heart

Instead of focusing on treating the symptoms of heart disease, people are seeking strategies to prevent heart disease from developing in the first place.

#### Eating Air

When producing aerated sugar confectionery the viscosity (determined by the sugar concentration), the whipping time, and the amount and type of whipping agent are important parameters.

### BEVERAGE

#### Beyond Your Regular Beverage

Consumers are increasingly looking at packaged beverages to fulfil alternative needs and benefits.

### HEALTH & NUTRITION

#### Inner Beauty That Shows

Products that support health and appearance from inside are gaining popularity as consumers begin to understand that what they eat affects how they look.

### AUTOMATION & FEATURES

#### Machine Vision: A Bull's Eye On Safety

Virtually every product that is manufactured in high volume, or at high accuracy, or that has to be made at very low cost, can be made better, faster, and cheaper using machine vision.
